

1/2" – 2-1/2" (DN 15 – 65) standard port and 1/2" – 2" (DN 15 – 50) full port Jamesbury™ series 4000 ball valves

The Jamesbury series 4000 ball valves offer the three most desirable attributes of high-quality valves: exceptional performance, great versatility, and economical cost. This valve line includes both standard-port valves (to 2-1/2" [DN 65]) and full-port valves (to 2" [DN 50]) with three available end connections-threaded end, socket weld, and butt weld.

There are two basic groups of Series 4000 valves.

Fire-Tite valves are fire-tested to meet API 607 requirements. They are ideal for handling petroleum products and other flammable or hazardous substances, as well as for an extremely broad range of normal and corrosive services. These Series 4000 valves are available in materials conforming to NACE MR0103 requirements, and specifically prepared for oxygen or high-vacuum service. They are also available to conform to ASME, API, BS, ISO, DIN and MSS standards. Standard body and trim materials for Fire-Tite valves are

Standard body and trim materials for Fire-Tite valves are carbon steel with 316 stainless steel trim and all 316 stainless steel. Seat material options are PTFE (T) and Xtreme³¹ (X) seats for applications involving chemicals, petrochemicals, acids, caustics and steam. Delrin³² (R) seats are for higher pressures, while PFA (B) seats resist the effects of polymerizing monomers such as butadiene and styrene. Metal (D) seats are also available for use with high-temperature fluids, saturated steam, and other heat-transfer media at pressures to 300 psi (20.7 bar) and temperatures to 600°F (316 °C).

Non-Fire-Tite Valves

Non Fire-Tite valves are available in the same body and trim materials as Fire-Tite valves with a wider range of seat material options. Xtreme (X) seats are the standard seat material, while PTFE (T), UHMW (U) polyethylene seats and PEEK (L) seats are also available.

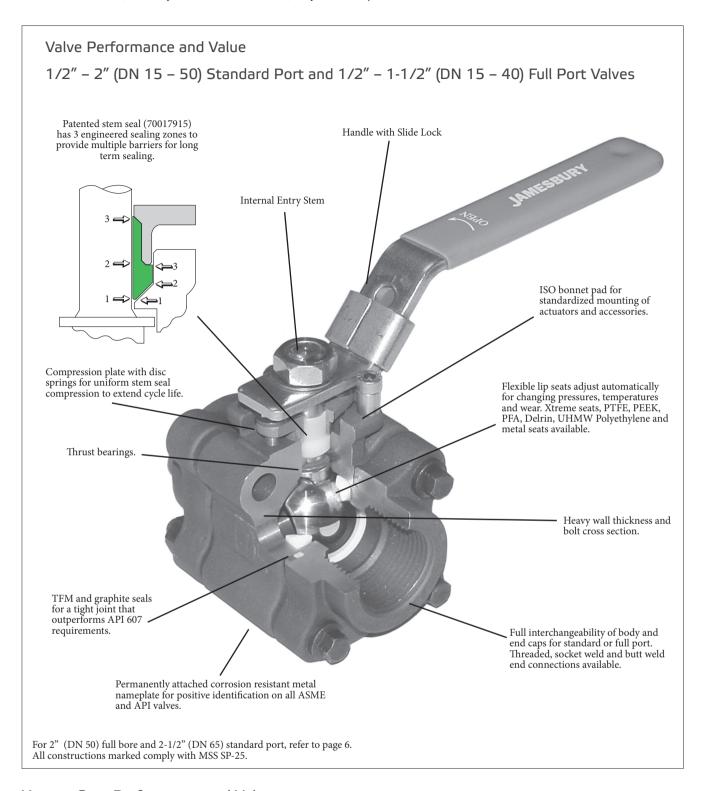

Features and benefits

- Xtreme seats provide longer life and expanded pressuretemperature capability.
- Flexible lip seat provides bi-directional zero-leak shut-off and cavity pressure relief.
- Available to meet ASME Class 800 for 1/2" 2" RB & 1/2" 1-1/2" FB and ASME 400 for 2-1/2" RB & 2" FB standards per B16.34, B31.1, B31.3, and B31.4. CWP ratings shown on p11.
- 3-piece construction facilitates servicing.
- Fire-Tite version with non-metallic seats meets API 607.
- Standard materials meet requirements of NACE MR0103 and MR0175 (see p12).

Features and benefits

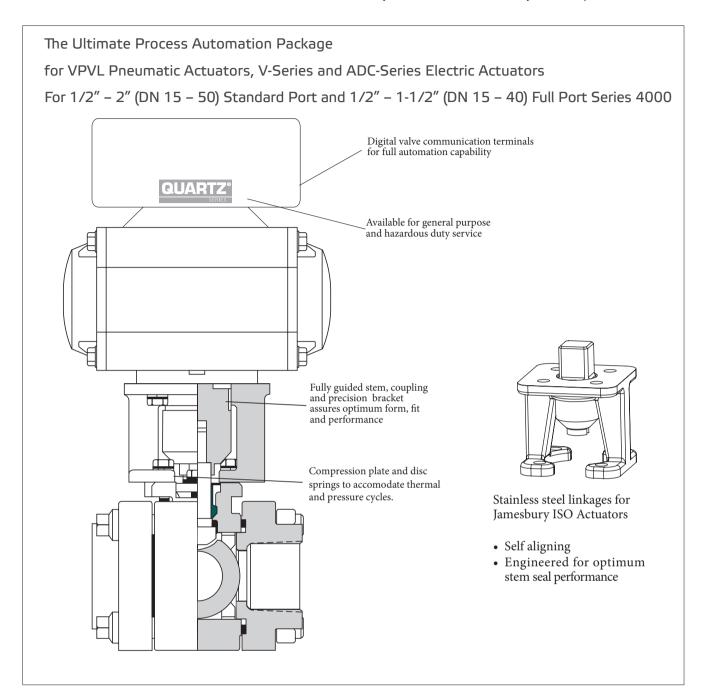

For 1/2" – 2" (DN 15 – 50) standard port and 1/2" – 1-1/2" (DN 15 – 40) full port valves

- Patented stem seal system is live loaded and engineered to assure long sealing life.
- ISO 5211 Bonnet for global conformity.
- CE Marking option.
- Stainless steel linkage for VPVL, V-Series and ADC-Series actuators has a guided coupling to align topworks during assembly and eliminate side load stress on stem seals for long life, clean environment and reduced maintenance.
- For most seat materials, weld end valves do not require disassembly before welding in-line. Refer to Installation, Maintenance, and Operating instructions (IMO) for details.

Xtreme Seat Performance and Value

Xtreme seats provide longer life, expanded performance boundaries, and the greatest possible value. Xtreme seats are made of a unique material that resulted from a technological breakthrough in our polymer research lab. The material is a fluoropolymer-based blend that provides superior quarter-turn performance.

Automation Performance and Value

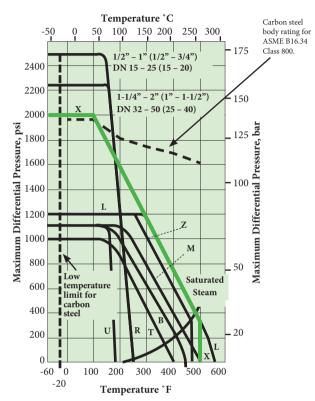

Series 4000 valves combined with Jamesbury actuators, network capable valve monitors and communication devices offer a total value and performance package. Available with pneumatic Valv-Powr™ VPVL actuators, V-Series and ADC-Series electric actuators and with Stonel™ Quartz™, Eclipse™, and Hawkeye™ digital monitors or VCTs, the packages have a wide range of applications. Visit our website at www.valmet.com/flowcontrol.

B105-1EN - 5/2022 3

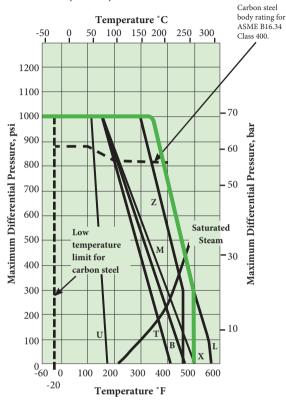

Valve Seat Ratings

These ratings are based on differential pressure with valve ball in the fully closed position and refer to seats only. Refer to valve body ratings on page 11 to be sure that all components are satisfactory for the application. Valves in carbon steel are suitable for service to -20°F (-29°C), valves in 316 stainless steel to -100 °F (-73 °C) or -40°F (-40°C) with Delrin seats. Lower temperature limits for body boltings are B7: -20 °F (-29 °C), B7M: -50 °F (-46 °C), L7M: -60 °F (-51°C), B8: -100 °F (-73°C).

1/2" - 2" (DN 15-50) Standard Port, 1/2" - 1-1/2" (DN 15-40) Full Port Valves

2-1/2" (DN 65) Standard Port, 2" (DN 50) Full Port Valves

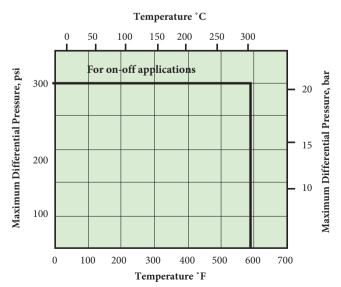

X-Xtreme Seats T-PTFE M-Filled PTFE R-Delrin L-PEEK U-UHMW polyethylene B-PFA Z-TFM

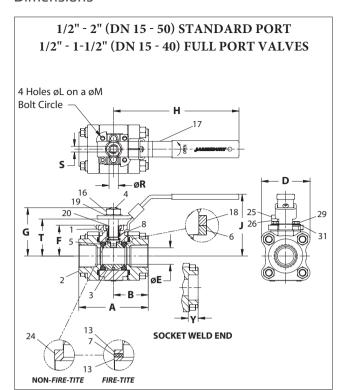

*Full port sizes in parenthesis.

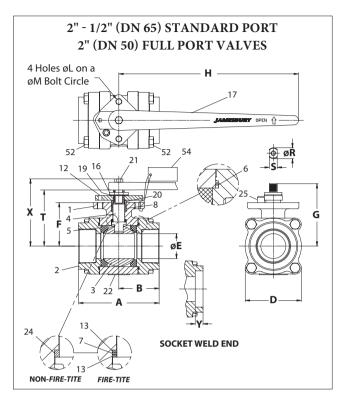

Note: All 1/2" (DN 15) Series 4000 valves have 1/2" (DN 15) port.

VALVE TORQUE DATA

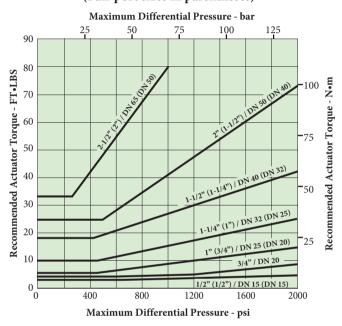

Use these torque charts for Series 4000 valves as a guide for actuator selection. For torque output values and actuator selection tables refer to actuator bulletins.

Additional requirements may be imposed by media characteristics, trim, and frequency of valve operation.

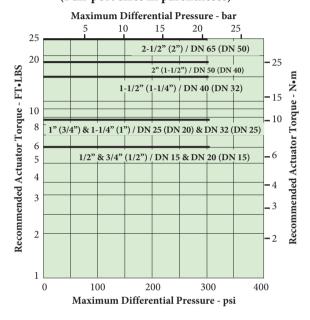

For difficult service (slurries, semi-solids) increase values by 50%. If in doubt, select a larger actuator.

Values shown in the charts are based on using standard factory procedures for valve-actuator assembly.

ACTUATORS

Neles offers a full line of integrally designed actuators for automated systems and for easier control of inaccessible or remote valves. Pneumatic actuators that include doubleacting and spring-return piston, vane, and rack and pinion units, spring-diaphragm types, and electric actuators are available for all valves. Electric actuators are available with both watertight and hazardous location enclosures. For further information on actuators for Series 4000 valves, see the following:

ACCESSORIES

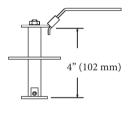

Bonnet Extensions SE-096, 097 & 098

4" (102 mm) bonnet extensions are available for applications that require insulated pipe, which are particularly useful for automated products. Bonnet extensions can also be used to prevent interference between actuators and companion pipelines and equipment. They are ideal for units that require locking lever or locking oval handle capability.

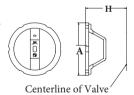

Stem Extensions SE-093, 094 & 095

A standard 4" (102 mm) stem extension is offered for Series 4000 valves (1/2" - 2") for improved accessibility, particularly when used in insulated pipelines. Stem extension kits can be ordered factory-mounted or shipped separately for field mounting.

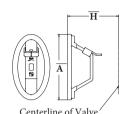

Round Handles

Series 4000 ball valves have optional round handles available. To order handles separately, specify the part number shown in the accessories table below.

Type

Bulletin Ouadra-Powr™ OPX Spring Diaphragm Actuators A110-4 Valv-Powr™ VPVL Rack and Pinion Actuators A111-5 V-Series Electric Actuators V200-1 **ADC-Series Electric Actuators** V201-1

Stainless steel linkages for Jamesbury ISO Actuators

Optional oval handle saves space and

may be padlocked to retain the valve

Oval handles with slide-lock

in the open or closed position.

- Self aligning
- Engineered for optimum stem seal performance

Cavity Fillers

Cavity fillers are available in 4000 series valves. The fillers are PTFE material when ordered with a TT seat and seal code and Xtreme material when ordered with a XT seat and seal code. Cavity fillers are used in processes where cross contamination is a concern. Food processing, pharma-chemicals, cosmetics, paints, solvents, finishes and dyes are typical applications where fillers are employed.

SPECIFICATIONS

Series 4000 valves are available in types that meet the following industry specifications

Specification	Description
ASME B1.20.1	Pipe Threads
ASME B16.11	Steel Fitting Socket Welding & Thread
ASME B16.25	Buttwelding Ends
ASME B16.34	Valves-Flanged and Buttwelding Ends
ASME B31.1	Power Piping
ASME B31.3	Chemical Plant & Petroleum Refining Pipin
ASME B31.4	Liquid Petroleum Piping
API 598	Valve Inspection & Testing
API 607	Fire Test for Soft-seated Valves (Div. of
	Refining)
API 608	Metal Ball Valves - Flanged, Threaded and
	Welding End
BS 21	Specification for pipe threads for tubes and
	fittings where pressure-tight joints are made
	on the threads (metric dimensions)
DIN 2999-1	Pipe threads for tubes and fittings; parallel
	internal thread and taper external thread;
	tread dimensions
ISO 17292	Metal Ball Valves for petroleum,
	petrochemical and allied industries

Valve Body Ratings

These are the maximum working pressure ratings of the valve body only. The seat ratings on page 4 determine the practical pressure limitation in actual service. Working pressure rating is at $-20\,^{\circ}\text{F}$ to $+100\,^{\circ}\text{F}$ ($-29\,^{\circ}\text{C}$ to $+38\,^{\circ}\text{C}$).

Standard Version - Body Rating

Valve	Size*	Working Pressure - Body Material: Carbon Steel and 316 Stainless Steel				
Inches	DN	psi	bar			
1/2 - 1 (1/2 - 3/4)	15 – 25 (15 – 20)	2500	172			
1-1/4-2 $(1-1-1/2)$	32 - 50 (25 - 40)	2250	155			
2-1/2 (2)	65 (50)	1000	69

Flow Data

The table below provides flow coefficients, C_v , of Series 4000 valves. The C_v values represent the flow of water at +60 °F through the valve in U.S. gallons per minute at a pressure drop of 1 psi.

Valve	e Size	Standard port	Full port	
Inches	DN	C _v * 1	C _v *	
1/2	15	13	13	
3/4	20	33	40	
1	25	44	65	
1-1/4	32	46	90	
1-1/2	40	95	135	
2	50	111	251	
2-1/2	65	216	_	

 $^{{^*}C_v} = 1.167 \text{ K}_v$

Maximum Leakage Rates

All series 4000 valves are factory tested with air. Polymeric seated valves are verified to be bubble tight using 100 psi air. Metal seats are also tested with air to ensure that leakage does not exceed the rates shown below.

Valve Siz	e - inches	Leakage Rate - scfm at Differential Pressure						
Standard Port Full Port		100 psi	200 psi	300 psi				
1/2	1/2	5.0	7.0	8.6				
3/4	_	7.0	9.9	12.1				
1 - 2	3/4 - 1-1/2	9.0	12.7	15.5				
_	2	11.0	14.0	17.0				

Valve Si	ze - DN	Leal Diff	kage Rate - m erential Pres	³ /hr sure
Standard Port	Full Port	7 bar	14 bar	20 bar
15	15	8.5	11.9	14.6
20	_	11.9	16.8	20.6
25 - 50	20 - 40	15.3	21.6	26.3
_	50	18.7	23.8	28.8

HOW TO ORDER SERIES 4000 BALL VALVES

To specify a Series 4000 valve, select the body style, the combination of body and trim material, the proper seat material, and the appropriate body bolts for the application. Code numbers are fully descriptive of a valve. They are made up of size and a figure designation based on the following coding:

EXAMPLE: This order code calls for a 3/4" standard port NPT Fire-Tite valve with carbon steel body, 316 stainless steel ball and stem, Xtreme seats and PTFE seals, and ASTM A193 Gr. B7 bolts with ASTM A194 Gr 2H nuts.

1	2	3	4	5	6	7	8	9
3/4	4A	_	_	22	36	XT	В	1

1	Size - 1/2 – 2-1/2 (DN 15-65) Standard Port, 1/2 – 2 (DN 15-50) Full Port						
inches	1/2	3/4	1	1-1/4	1-1/2	2	2-1/2
DN	15	20	25	35	40	50	65

2	Body Style
4A	Standard port NPT
4B	Full port NPT
4C	Std. Port socket weld
4D	Full port socket weld
4F	Std. port butt weld Schedule-5
4G	Std. port butt weld Schedule-10
4H	Std. port butt weld Schedule-40
4J	Full port butt weld Schedule-5
4K	Full port butt weld Schedule-10
4L	Full port butt weld Schedule-40
4M	Std. port NPT x soc. weld ends
4N	Full port NPT x soc. weld ends
4P	Full port butt weld Schedule 80
4Q	Std. port butt weld Schedule 80
4R	Std. port ISO 7 Rp (BS21 parallel DIN 2999)
4S	Std. port ISO 7 Rc (BS21 taper)
4T	Full port ISO 7 Rp (BS21 parallel DIN 2999)
4U	Full port ISO 7 Rc (BS21 taper)

3	Configuration
-	(no entry if Fire-Tite)
X	Non-Fire-Tite
В	ASME B16.34
M ^{3*}	ASME B16.34 with metric nameplate

4	Special Service
-	(no entry if standard)
N	NACE MR0103 w/exposed body fasteners
O	Oxygen
Q	Cavity Filler (Xtreme w/ XT, PTFE w/ TT)
V	High vacuum
VC	High vacuum certified
С	Chlorine
TG	Top Ground
STGR	Top and Bottom Ground
LA	Standard Emission Pak™ w/o Leakoff Connection *
LL	Standard Emission Pak™ with Leakoff Connection *
•	

5	Body Material
22 ⁶	Carbon steel
36 ⁶	316 Stainless steel

6	Ball and stem material
00	Same as body (Carbon steel not available)
36^{6}	316 Stainless steel
${\rm HB^6}$	316 Stainless steel ball, 17-4 PH stem (required for DH, RT & LG seats & seals)
71 ⁶	Monel
73	Hastelloy C

7	Seat and Seal Material				
7	Seats	Seal			
	Standard Fire-Tit	e Options			
XT ⁵	Xtreme	TFM & Graphite			
TT	PTFE	PTFE & Graphite			
DH	17-4 PH Stainless steel	Graphite			
UU	UHMW Polyethylene*	UHMW PE & Graphite			
$RT^{2,4}$	Delrin*	PTFE & Graphite			
BT	PFA	PTFE & Graphite			
	Non-Fire-Tite (Options			
TT	PTFE	PTFE			
UB	UHMW Polyethylene	UHMW Polyethylene & EPT			
$LG^{2,4}$	PEEK*	PEEK & Graphite			
$LT^{2,4}$	PEEK**	PTFE & Graphite			

8	Valve Model		
A	Series 4000 Model A**		
В	Series 4000 Model B*		

9	Body Fasteners	
	Bolts or Tie Rods	Nuts
1	ASTM A193 Gr. B7	ASTM A194 Gr. 2H
2	ASTM A193 Gr. B8 or B8M2	ASTM A194 Gr. 8, 8C, 8F, 8M, 8MN, 8N, 8P, or 8T
5 ¹	ASTM A193 Gr. B7M	ASTM A194 Gr. 2HM
7 ¹	ASTM A320 Gr. sL7M	ASTM A194 Gr. 7M
8 ¹	ASTM A453 Gr. 660	ASTM A453 Gr. 660

- For 1/2" 2" (DN 15 50) standard port and 1/2" 1-1/2" (DN 15 40) full bore valves
 For 2" (DN 50) full bore and 2-1/2" (DN 65) standard port only.

- For NACE MR0103 service, if buried or insulated. Requires high strength stem.
 Valves larger than 1" (DN 25) are CE marked. Not a self-relieving seat design.
 Seats fully rated to CL800 pressure up to 100°F. TFM is a registered trademark of Dyneon Co.
- Delrin is a registered trademark of DuPont Co. Material meets NACE requirements for sour environments. For valves to be in full compliance with NACE, both the body (sign #5) and trim (sign #6) must meet the NACE requirement.

NOTE: As the use of the valve is application specific, a number of factors should be taken into account when selecting a valve for a given application. Therefore, some of the applications in which the valves are used are outside the scope of this document. If you have any questions concerning the use, application or compatibility of the valve with the intended service, contact Valmet for more information.
